

Module 1: Understanding Your Body (Human Anatomy and Physiology)

Core Components of a Puberty Module

1. Introduction to Puberty:
 - a. Defining puberty as a natural transition from childhood to adulthood.
 - b. Explaining it happens to everyone but at different times.
 - c. Normalizing confusion and new feelings.
2. Physical Changes (Both Boys & Girls):
 - a. Hormonal Basis: The role of estrogen and testosterone.
 - b. Growth: Height, weight, body composition changes.
 - c. Body Hair: Pubic, underarm, facial hair.
 - d. Body Odor: Apocrine glands and hygiene management (showers, deodorant).
 - e. Skin: Acne/pimples and management.
 - f. Posture: Poor posture as a temporary concern.
3. Specific Changes (Girls):
 - a. Breast development (Thelarche).
 - b. Onset of menstruation (Menarche).
 - c. Menstrual cycle basics, products (pads, tampons), PMS.
4. Specific Changes (Boys):
 - a. Genital changes, voice deepening, muscle mass.
 - b. Emotional & Social Development:
 - c. Mood swings, increased independence.
 - d. Shifting relationships with family and peers.
 - e. Developing self-identity and values.
5. Health & Wellness:
 - a. Hygiene routines.
 - b. Nutrition during growth spurts.
 - c. Preventing sexual harassment, understanding consent.
6. Activities & Resources:
 - a. Ground rules for respectful discussion.
 - b. Health portfolios for tracking changes.
 - c. Educational videos and online resources (e.g., Brook, NSPCC).
 - d. Myth-busting sessions.

Learning Objectives

- Understand and accept physical/emotional changes as normal.
- Develop empathy for peers.
- Learn practical hygiene and health management skills.
- Identify resources for further learning and support.

Module Structure (e.g., for Grades 4-6)

Lesson 1: What is Puberty? (Normalizing changes, ground rules).

Lesson 2: Body Changes (Anatomy, hormones, growth).

Lesson 3: Periods & Products (Menstruation basics).

Lesson 4: Hygiene & Body Image (Odor, skin, self-care).

Lesson 5: Emotions & Relationships (Moods, respect, consent).

Lesson 6: Taking Charge (Health, myths, next steps).

Module 2: Relationships & Consent

Core Components of a Relationships and Consent Module

1. Defining Healthy Relationships: Identifying qualities like trust, respect, equality, and support, contrasting with toxic patterns (control, jealousy, criticism).
2. Understanding Consent: Emphasizing that consent must be freely given, enthusiastic, ongoing, specific, and can be withdrawn at any time (the "continuum" concept).
3. Communication Skills: Practicing assertive communication, active listening, setting boundaries, and expressing needs clearly.
4. Recognizing Red Flags & Harm: Identifying signs of sexual harassment, coercion, intimate partner violence, and unhealthy dynamics.
5. Emotional Intelligence: Managing feelings, dealing with rejection, understanding personal values, and building self-esteem.
6. Digital Citizenship: Navigating consent and respect in online environments (sexting, social media).

Learning Objectives

- Empower individuals to make informed decisions about their bodies and relationships.
- Foster empathy and respect for diverse identities and experiences.
- Reduce instances of gender-based violence and promote safer sexual health.

Module Structure (e.g., for Grades 4-6)

Lesson 1: The Meaning of Consent

Lesson 2: Myths and Law

Lesson 3: Communication Consent

Lesson 4: Consent Scenarios

Lesson 5: Help and Support

Module 3: Pregnancy & Family Planning

Core Components of Pregnancy and Family Planning Module

1. Human Reproduction & Fertility:
 - a. Anatomy and physiology (male/female reproductive systems).
 - b. Menstrual cycle and ovulation (signs like temperature changes, cervical mucus).
 - c. Fertilization and early pregnancy.
 - d. Infertility basics.
2. Family Planning Methods (Contraception):
 - a. Barrier Methods: Condoms (male/female), diaphragms.
 - b. Hormonal Methods: Pills, injections, implants, patches, rings.
 - c. Long-Acting Reversible Contraception (LARCs): IUDs, implants.
 - d. Permanent Methods: Sterilization (tubal ligation, vasectomy).
 - e. Emergency Contraception.
 - f. Effectiveness, correct usage, benefits, and potential side effects.
3. Pregnancy Prevention & Planning:
 - a. Birth spacing (recommended intervals, risks of short intervals).
 - b. Informed choice and decision-making for individuals/couples.
 - c. Abstinence and delaying pregnancy.
4. Health Risks & Consequences:
 - a. Risks of early pregnancy/childbearing for adolescents (physical, educational, economic).
 - b. Unintended pregnancies and unsafe abortions.
 - c. Sexually Transmitted Infections (STIs) and HIV prevention.
5. Counseling & Support:
 - a. Importance of confidential, non-judgmental counseling.
 - b. Where to access services (clinics, health centers).
 - c. Reproductive rights and responsible parenthood.

Learning Objectives

- Increase knowledge and skills for sexual health.
- Promote healthy relationships and responsible choices.
- Reduce unintended pregnancies and STIs.

Module Structure (e.g., for Grades 4-6)

Lesson 1: The Family Planning Program

Lesson 2: Family Planning and Reproductive Health

Lesson 3: Maternal High Risk Factors

Lesson 4: Health Benefits of Family Planning

Lesson 5: Help and Support
